[Where We Are](#)

Our Mission is to

empower underserved communities with the tools of technology.

We serve 15 Texas counties with public computer technology and training, a free wireless network and more.

Connected Texas: 7.4 million Texans use the Internet for online classes and to study.

We Empower Communities Through Technology

Former Purdue University Dean Joins Our Board

Emily R. Mobley Newest Board of Directors Member

We welcome Emily Ruth Mobley as our newest Board of Directors member.

She has most recently served as an Esther Ellis Norton Distinguished Professor in Library Science and Purdue University's Dean of Libraries and Professor of Library Science—the first African-American dean in Purdue's history. She has received numerous awards and honors and is featured in, among other biographies, Who's Who in the World.

Mobley's work to enhance libraries through technology makes her an excellent addition. She oversaw Purdue's library adaption to technology, from Purdue's Digital Learning Collaboratory to THOR (The Online Resource); no easy task in the days before the Internet came to the campus. "We manage to create great efficiencies by moving to the digital world for information," she said in a 2007 interview.

"She brings a wealth of experience and leadership to TFA and a particular concern about digital inclusion for older adults," says Technology For All President & CEO Dr. Will Reed.
